

Tanishk Jain

Software Engineer | Core Java | Automation | AI Agents
tjtanishkjain0009@gmail.com | 7852837166

EDUCATION

NIRMA UNIVERSITY

MAJORS ELECTRONICS &

COMMUNICATION ENGINEERING

May 2025 | Ahmedabad, Gujarat

Institute of Engineering

CGPA: 7.58/10

NIRMA UNIVERSITY

MINORS COMPUTER SCIENCE

ENGINEERING

May 2025 | Ahmedabad, Gujarat

Institute of Engineering

ST. ANTHONY SR. SEC. SCHOOL

PCM

July 2021 | Udaipur, Rajasthan

Percentage: 90.6/100

COURSEWORK

Data Structures & Algorithms

Object Oriented Programming

Database Management Systems

Operating Systems

Computer Networks

SKILLS

LANGUAGES:

Java (Core Java) • Python • JavaScript •

C++ • C • Spring

AI & AUTOMATION:

AI Agents • MCP (Model Context

Protocol) • Prompt Engineering • LLM

Workflows • AI Evaluation • AI-Assisted

Development • Workflow Automation

WEB DEVELOPMENT:

React • Redux.js • Tailwind CSS • Node.js

• Express.js • REST APIs • JWT

DATABASES:

MySQL • PostgreSQL • MongoDB • SQL

TOOLS & PLATFORMS:

Git • GitLab CI/CD • Docker • JIRA •

Postman • Sumo Logic • Selenium

EXPERIENCE

INFOR | ASSOCIATE SOFTWARE ENGINEER

June 2025 – Present | Ahmedabad, Gujarat

- Migrated legacy Fujita automation framework components to **Core Java** and **Selenium**, improving maintainability and eliminating dependency on Fujita Git runners using customized AI Agent.
- Started working on file system migration from FSX to S3.

INFOR | DEVELOPMENT INTERN

Jan 2025 – June 2025 | Ahmedabad, Gujarat

- Worked with the **Infrastructure team** to restructure and optimize **GitLab CI/CD pipelines**.
- Reduced pipeline execution overhead by optimizing regression job structure to **one-third of the original size**, lowering GitLab runner infrastructure costs.

EINFOCHIPS | TEAM LEADER

May 2024 – June 2024 | Ahmedabad, Gujarat

- Worked on RTL-to-GDS automation flow using the **OpenROAD** toolchain for physical design automation.
- Led a team of **4 engineers**, managing task allocation, documentation, and development coordination.

PROJECTS

AI AUTOMATION AGENT FOR INFOR HACKATHON

Python, MCP, Agents, Java, JIRA API, Zephyr API

- Built an **AI-driven QA automation agent** that reads JIRA tickets, extracts MR details, and automatically generates Zephyr test cycles.
- Integrated Selenium script generation and JIRA-Zephyr linking, reducing manual QA effort by **over 60%**.
- Improved test management efficiency by automating test case creation and linking within the QA workflow.

AUTO TIME TABLE SCHEDULING SYSTEM

React.js, Node.js, Express.js, MySQL

- Developed an automated timetable generator that schedules classes by considering constraints like faculty availability, room allocation, and subjects.
- Implemented a constraint-based scheduling algorithm with a full-stack dashboard for administrators to generate, modify, and export timetables.

AI-POWERED INCIDENT INVESTIGATION AGENT

Python, MCP, Claude AI, Sumo Logic, GitLab API, JIRA API

- Built an AI-powered engineering investigation agent that connects Claude AI with **Sumo Logic** using **MCP (Model Context Protocol)** to automate production issue analysis.
- Enabled automated log analysis by extracting application errors, tracing impacted **Java classes**, and identifying potential root causes from stack traces.
- Integrated **GitLab** and **JIRA** workflows to retrieve recent code changes, related merge requests, and relevant tickets for contextual debugging.
- Generated AI-driven root cause summaries and actionable insights by correlating logs, source code history, merge requests, and engineering requirements.
